Detailed Action

Response to Amendment

Claims 19, 23, 26, 28-29, 49, 53-81, and 84-94 are pending. This action is in response to the remarks received January 3, 2008.

Response to Arguments

Applicant's arguments with respect to claims 19, 23, 26, 28-29, 49, 53-81, and 84-94 have been considered but are moot in view of the new ground(s) of rejection.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 19, 23, 26, 28-29, 49, 53-81, and 84-94 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1-51 of U.S. Patent No. 6,138,106. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 19, 23, 26, 28-29, 49, 53-81, and 84-94 of pending application 09/218,085 is the same method for intended

use as claims 1-51 of U.S. Patent No. 6,138,106. The additional limitation discloses by pending application 09/218,08 is "mystery" while all the other limitations in claims 19, 23, 26, 28-29, 49, 53-81, and 84-94 are the same as claims 1-51 of U.S. Patent No. 6,138,106.

In addition, claims 19, 23, 26, 28-29, 49, 53-81, and 84-94 are provisionally rejected on the ground of nonstatutory double patenting over claims 1-56 of copending Application No. 11/282,525. This is a provisional double patenting rejection since the conflicting claims have not yet been patented.

The subject matter claimed in the instant application is fully disclosed in the referenced copending application and would be covered by any patent granted on that copending application since the referenced copending application and the instant application are claiming common subject matter, as follows: Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 19, 23, 26, 28-29, 49, 53-81, and 84-94 of pending application 09/218,085 is the same method for intended use as claims 1-56 of copending Application No. 11/282,525. The additional limitation discloses by copending Application No. 11/282,525 is "two mystery" while all the other limitations in claims 19, 23, 26, 28-29, 49, 53-81, and 84-94 are the same as claims 1-51 of copending Application No. 11/282,525.

Furthermore, there is no apparent reason why applicant would be prevented from presenting claims corresponding to those of the instant application in the other copending application. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.
